

# HIGH SECURITY ROOFLIGHT LPS 1175 SR2

The Rooflight Co. is the only company in the world to offer Rooflights which are Secured by Design accredited and LPCB certified to LPS 1175 (Loss Prevention Standard 1175) issue 7, (categories SR2 and SR3). This standard ensures resistance to forced entry, giving our clients absolute confidence in the security and protection provided.

**Security Rating 2 (SR2) :** Products certified to this security rating provide resistance to opportunist attempts at forced entry, at a medium domestic risk and a lower commercial risk. This rating certifies that the product has been tested to withstand attacks using bodily force and a range of hand tools, including those that create noise.

Installed onto a hardwood timber, reinforced concrete or steel kerb, the High Security Rooflight SR2 can be tailored to a size to suit your project within the size parameters referenced in the grid below.

### Glazing Specifications:

6mm/8mm/10mm Solar and Low E Toughened Outer, 12mm 90% Argon Cavity, 18mm TSG DCT18 Laminate Inner

Manufactured under a quality management system independently certified by LPCB to ISO 9001 (certificate no. 929).
