

HIGH SECURITY ROOFLIGHT

The Rooflight Co. is the only company in the world to offer Rooflights which are Secured by Design accredited and LPCB certified to LPS 1175 (Loss Prevention Standard 1175) issue 7, (categories SR2 and SR3). This standard ensures resistance to forced entry, giving our clients absolute confidence in the security and protection provided.

Optimally designed for sensitive buildings, the High Security Rooflights are utilised for projects requiring ultimate security; banks, data centres, record centres, anti-terrorism and private residences.

Secured by Design is a prestigious accreditation that showcases products and developments designed to promote safety and enhance security measures. The High Security Rooflight offers higher security and protection than any other in the world, being LPCB certified to LPS 1175.

In order to achieve Secured by Design status, the High Security Rooflight had to adhere to rigorous test standards required by Loss Prevention Certification Board (LPCB). Secured by Design is the only way for products to achieve this level of recognition in the UK.

LPS 1175 Issue 7
Cert/LPCB Ref. 929b

Our LPCB certification can be viewed via our Redbook Live listing [here](#). The RedBook is the LPCB list of Approved Fire & Security Products and Services; a prestigious reference for specifiers, regulators, designers and end users.

FEATURES AND SPECIFICATIONS:

Projects of a sensitive nature all over the world feature the High Security Rooflight. These include banks in Europe, data centres in Europe, record centres in the UK and private residences in the UK.

The high security rooflight can be manufactured from grade 304 stainless steel, or grade 316 stainless steel for coastal locations. Each rooflight is treated with a protective polyester powder coating, further enhancing the strength, resilience and longevity. The standard frame is finished in a textured semi-gloss paint finish in black RAL 9005 (other RAL colour options available).

The High Security Rooflight has been accredited to two safety ratings.

Security Rating 2 (SR2) : Tested for medium domestic risk and a lower commercial risk, using bodily physical force and hand tools.

Security Rating 3 (SR3) : Tested for low commercial risk, tested using moderate resistance with tools with a significant mechanical advantage.

The Rooflight Co's kerb detail is fully accredited to LPS1175 to ensure your installation meets strict security requirements. The High Security Rooflight has been approved for installation onto a concrete structural kerb for SR2 and SR3 and hardwood structural kerb for SR2.

Employee owned and a certified B-Corp organisation, we are committed to improving the standards of our products for our people and the local community, and to reducing our impact on the environment. We are The Rooflight Co. The premium rooflight manufacturer for properties of architectural significance.
